

Hemanth Naga Venkata Sai Kata

Hyderabad, Telangana | 8464869686 | katahemanth999@gmail.com | github.com/hemanthkata | linkedin.com/in/hemanth-kata

PROFESSIONAL SUMMARY

Motivated Java Developer with 1+ year of professional experience building and maintaining enterprise-grade web applications. Proficient in Java 11, Spring Boot, Hibernate ORM, and RESTful API development, with hands-on exposure to PostgreSQL optimization, CI/CD pipelines, and AWS cloud deployments. Experienced in full-stack development, database schema design, and delivering custom business solutions across ERP and service management domains. Passionate about writing clean, maintainable code and continuously improving system performance.

TECHNICAL SKILLS

Languages: Java 11, Python, JavaScript (ES6+), SQL, Shell Scripting (Bash), HTML5, CSS3

Frameworks & Libraries: Spring Boot, Hibernate ORM, Spring Security, FastAPI, React.js, Pydantic

Web Services: RESTful APIs, JSON, OpenAPI/Swagger, OAuth2, JWT Authentication, Webhook Handling

Databases: PostgreSQL (Query Optimization & Indexing), Oracle DB, MySQL, Redis

Cloud & DevOps: AWS (EC2, S3, RDS, CloudWatch), Docker, Jenkins, Nginx, CI/CD (GitHub Actions), Git/GitHub

Monitoring & Tools: Splunk, AppDynamics, Jira, ServiceNow, Postman, IntelliJ IDEA, VS Code

Background Processing: Celery, Async/Await, SQLAlchemy ORM, Alembic Migrations

WORK EXPERIENCE

Software Developer (Java) | KCS Tech *Apr 2025 – Present*

Hyderabad, Telangana

- Developed and maintained Spring Boot microservices supporting internal service management workflows, including ticket handling, asset tracking, and automated incident routing for enterprise operations.
- Designed and deployed 15+ RESTful API endpoints consumed by internal dashboards and third-party integrations, implementing OAuth2 and JWT-based authentication to secure all service boundaries.
- Optimized PostgreSQL queries and redesigned indexing strategies, reducing average API response times from 2.1s to 0.4s across high-traffic service endpoints.
- Built and maintained Hibernate ORM-based data access layers with complex relational schemas; managed Alembic-style schema migrations with zero downtime during deployments.
- Implemented role-based access control (RBAC) using Spring Security, ensuring correct permission enforcement across admin, support, and end-user roles.
- Authored Bash automation scripts to handle daily health checks, log rotation, and scheduled data sync jobs, cutting manual operational overhead by approximately 20 hours per month.
- Managed application deployments and hotfixes across staging and production environments using Jenkins CI/CD pipelines and Docker containerization on AWS EC2.
- Used Splunk and AppDynamics to monitor application performance, analyze thread dumps, and resolve L2/L3 production incidents within defined SLA windows.
- Produced Root Cause Analysis (RCA) documents following critical incidents, driving process improvements that reduced repeat defects by over 30%.

Stack: Java 11, Spring Boot, Hibernate ORM, Spring Security, PostgreSQL, Oracle DB, Jenkins, Docker, AWS EC2/CloudWatch, Splunk, AppDynamics, Jira

Web Development Intern | VeriTech Software IT Services *Jan 2024 – Mar 2024*

Remote

Responsive Web Page

- Built a fully responsive webpage using HTML5 and CSS3, ensuring consistent rendering across major browsers and screen sizes; applied media queries and flexbox for adaptive layouts.

Landing Page

- Designed a conversion-focused landing page applying UX principles, clear visual hierarchy, and call-to-action placement to guide user behavior effectively.

Java Development Intern | VeriTech Software IT Services *Feb 2024 – Apr 2024*

Remote

Snake Game in Java

- Developed a fully functional Snake game in Java using Swing, implementing smooth directional movement, randomized food placement, collision detection, and a difficulty-based scoring system.

ATM Interface Project

- Built a console-based ATM interface simulating core banking operations — balance inquiry, deposit, withdrawal, and PIN validation — with input validation and session management.

Java Full Stack Developer Intern | [The Tap Academy](#) Jun 2023 – Jan 2024

Hyderabad, Telangana

- Completed intensive Java full stack training covering Core Java, OOP principles, Spring Boot, Hibernate, REST API design, HTML/CSS, and JavaScript.

Employee Management CRUD Application

- Built a full-stack employee management system using Spring Boot (backend), Hibernate ORM (data layer), and MySQL (database), exposing REST APIs for create, read, update, and delete operations.
- Developed a basic React.js frontend to consume the REST APIs, displaying employee records in a tabular layout with form-based add/edit functionality.
- Applied MVC architecture, DTO pattern, and service-repository layering; validated all inputs using Bean Validation annotations and handled errors with a global exception handler.

PROJECTS

POS Application | *Spring Boot, React.js, PostgreSQL, Redis, Docker, AWS, Stripe* [In Development]

- Architected a cloud-based Point-of-Sale system with a Spring Boot REST backend and React.js cashier interface, demonstrating end-to-end Java full-stack development.
- Implemented product catalog CRUD, real-time cart management, order processing workflow, PDF invoice generation, and JWT-based customer authentication.
- Integrated Stripe payment gateway with secure checkout and webhook-based payment confirmation; implemented async task queues for transactional email delivery.
- Built a sales analytics dashboard supporting date-range filtering, product performance reporting, and CSV/JSON data exports.
- Containerized with Docker and deploying to AWS (EC2/RDS/S3) via Jenkins CI/CD pipeline; JUnit and Mockito test suite in progress.

Thief Detection via Multiview Gait Recognition | *Python, GCNN, OpenCV, SVM, CNN*

- Developed a multi-angle posture-based gait recognition system using Graph Convolutional Neural Networks (GCNN) for enhanced thief detection accuracy across surveillance feeds.
- Published research paper accepted by MIC journal; applied image processing, feature extraction, and ML classification techniques using Python and OpenCV.

EDUCATION

B.Tech in Computer Science / Engineering 2019 – 2023

Dhanekula Institute of Engineering and Technology

CERTIFICATIONS

- AWS Academy Cloud Foundations – Amazon Web Services
- AWS Academy Machine Learning Foundations – Amazon Web Services
- Azure Data Engineer Associate – Microsoft
- PCAP: Programming Essentials in Python – Cisco Networking Academy / Open EDG Python Institute
- DevOps Foundation – Infosys Springboard
- Design Thinking for Innovation – Coursera
