

Hemanth Naga Venkata Sai Kata

Hyderabad, Telangana | 8464869686 | katahemanth999@gmail.com | github.com/hemanthkata | linkedin.com/in/hemanth-kata

PROFESSIONAL SUMMARY

Results-driven Junior Full Stack Developer with 2+ years of experience building and deploying scalable web applications. Proficient in Python backend development (FastAPI, Odoo Framework), React.js frontends, and PostgreSQL/MySQL databases. Hands-on experience designing and integrating 20+ RESTful APIs, implementing JWT/OAuth2 authentication, and optimizing database query performance. Passionate about writing clean, reusable code and collaborating in cross-functional teams to deliver high-performance web solutions.

TECHNICAL SKILLS

Languages: Python (Advanced), JavaScript (ES6+), Java, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Responsive Design, Cross-browser Compatibility

Backend: FastAPI (Async/Await), Python, Odoo Framework, RESTful API Design, Pydantic Validation

Databases: PostgreSQL (Query Optimization & Indexing), MySQL, Redis, MongoDB (familiar), Alembic Migrations

API & Auth: REST APIs, OAuth2, JWT Authentication, Webhook Handling, OpenAPI/Swagger

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Nginx, CI/CD (GitHub Actions), SSL/TLS, Git/GitHub

Background Processing: Celery, Redis, Async/Await, SQLAlchemy ORM

Tools: Git, Postman, Swagger/OpenAPI, VS Code, Technical Documentation

WORK EXPERIENCE

Software Developer | **KCS Tech** Apr 2025 – Present

Hyderabad, Telangana

- Developed and maintained full-stack web applications by extending 15+ core modules (Sales, Inventory, HR, Accounting, CRM) serving 500+ daily users, reducing operational processing time by 70% through automated workflows and custom business logic.
- Designed and deployed 20+ secure RESTful API endpoints, integrating 8+ third-party services including payment gateways (Razorpay, PayU), shipping providers (FedEx, DHL), and CRM platforms with OAuth2 and JWT authentication.
- Optimized PostgreSQL queries reducing average response time from 2.3s to 0.4s through strategic indexing and query restructuring; designed database schemas for custom modules with complex relational structures.
- Built 10+ production-ready custom modules including advanced inventory management, custom invoicing workflows, employee attendance systems, and client portals with QWeb PDF reporting.
- Implemented JWT-based authentication, role-based access control (RBAC), and API rate limiting (100 req/min) with comprehensive audit logging to secure sensitive business data.
- Configured 50+ automated background workflows and scheduled jobs (email notifications, report generation, data synchronization), reducing manual effort by 70%.
- Migrated 100K+ records from legacy systems with 99.9% data accuracy; built ETL pipelines for continuous data synchronization.
- Debugged and resolved critical application issues including XML parse failures, SQL computed-field errors, and WebSocket/longpolling configuration for real-time features.

Stack: Python, PostgreSQL, JavaScript, React.js, REST APIs, OAuth2, JWT, Git, Nginx, Linux

Java Development Intern | **VeriTech Software IT Services** Feb 2024 – Apr 2024

Remote

Snake Game in Java

- Built a fully functional snake game featuring smooth movement, random food placement, and a dynamic scoring system rewarding players based on snake length and difficulty.

ATM Interface Project

- Developed a user-friendly ATM interface system for banking operations, prioritizing usability and maintaining security standards through collaborative development.

Web Development Intern | **VeriTech Software IT Services** Jan 2024 – Mar 2024

Remote

Responsive Web Page

- Built a responsive webpage with HTML and CSS, ensuring consistency across browsers and devices; developed strong attention to web compatibility and cross-platform design best practices.

Landing Page

- Designed a focused, conversion-oriented landing page to drive specific user actions, applying principles of UX design and call-to-action optimization.

Full Stack Developer Intern | The Tap Academy *Jun 2023 – Jan 2024*

Hyderabad, Telangana

- Completed intensive full stack development training covering core Java, Spring Boot, Hibernate, REST APIs, HTML/CSS, and JavaScript.
- Built multiple full-stack projects applying MVC architecture, CRUD operations, and database integration with MySQL.

Self-Directed Full Stack Development (Parallel to Employment)

- Built microservices using FastAPI with async operations, Pydantic validation, JWT authentication, Celery background task processing, and OpenAPI/Swagger documentation.
- Developed full-stack applications combining FastAPI backends with React.js frontends, incorporating real-time WebSocket features, Stripe payment integrations, and cloud storage solutions.
- Implemented DevOps practices including Docker containerization, CI/CD pipelines via GitHub Actions, and AWS deployment (EC2, S3, RDS).

PROJECTS

POS Application | FastAPI, React.js, PostgreSQL, Redis, Celery, Stripe, Docker, AWS [In Development]

- Architected a cloud-based Point-of-Sale system with a FastAPI async backend and React.js cashier interface, demonstrating full-stack development capabilities end-to-end.
- Implemented modular features: product catalog CRUD, real-time shopping cart, order processing workflow, PDF invoice generation, and customer authentication with JWT tokens.
- Integrated Stripe payment gateway with secure checkout flow and webhook handlers for payment confirmation; built Celery task queues for asynchronous email delivery.
- Developed sales analytics dashboard with date-range filtering, product performance reports, and dynamic CSV/JSON data exports.
- Containerized with Docker; deploying to AWS (EC2/RDS/S3) with a CI/CD pipeline via GitHub Actions and a pytest test suite in progress.

Thief Detection via Multiview Gait Recognition | Python, GCNN, OpenCV, SVM, CNN

- Developed a multi-angle posture-based gait recognition system leveraging Graph Convolutional Neural Networks (GCNN) for enhanced thief detection accuracy.
- Published research paper accepted by MIC journal; applied image processing, feature extraction, and machine learning techniques using Python and OpenCV.

EDUCATION

B.Tech in Computer Science / Engineering *2019 – 2023*

Dhanekula Institute of Engineering and Technology

CERTIFICATIONS

- AWS Academy Cloud Foundations – Amazon Web Services
- AWS Academy Machine Learning Foundations – Amazon Web Services
- Azure Data Engineer Associate – Microsoft
- PCAP: Programming Essentials in Python – Cisco Networking Academy / Open EDG Python Institute
- DevOps Foundation – Infosys Springboard
- Design Thinking for Innovation – Coursera
